Where **innovation**  
unites the sciences for **justice**

## Cross-Cutting Innovation

The Global Forensic and Justice Center (GFJC) is focused on cross-cutting innovation to benefit forensic science and criminal justice. The GFJC not only bridges the crime scene to the courtroom, breaking down previously held silos of education and training in disciplines, but connects the research to the real-world through working partnerships with local, state, national and international agencies.

We are dedicated to not only creating innovation in the laboratories, but engaging in legal, engineering, environmental, nursing, and communication innovations. Our outreach events provide opportunities for professionals, researchers, students, and future forensic scientists to be connected to cutting-edge research.

Your support of our signature events throughout 2023 will create a lasting legacy of FIU's impact on forensic science and criminal justice around the world.

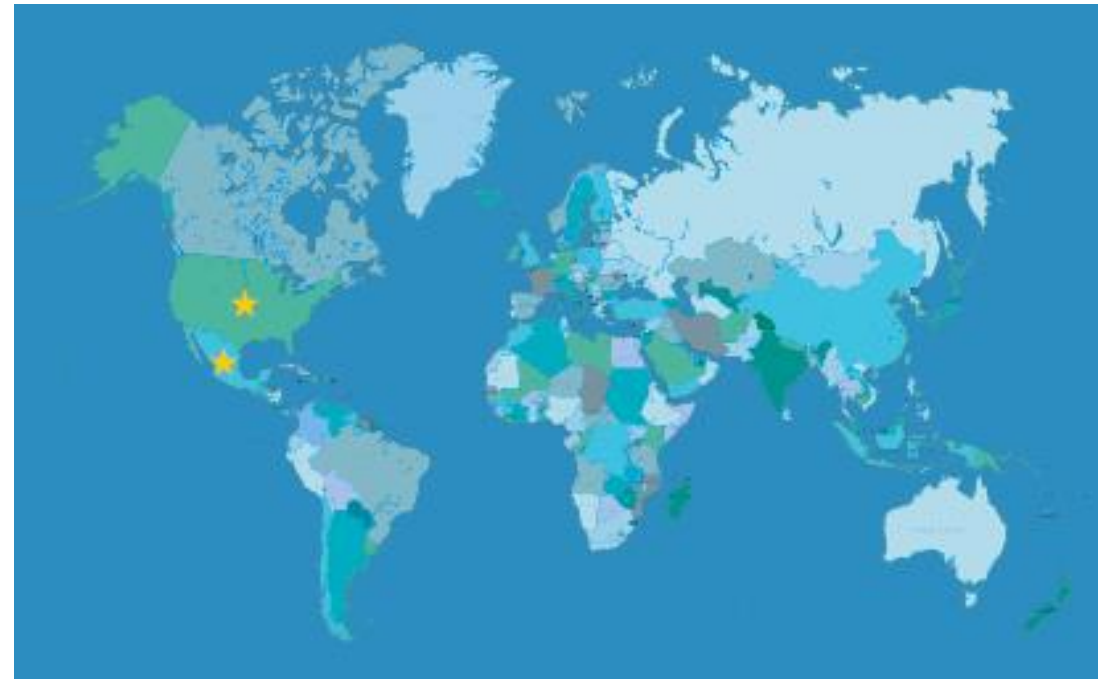

## A Global Impact

Our training and educational opportunities have a global reach.
